## Occupational English Test

**WRITING SUB-TEST: MEDICINE**

**TIME ALLOWED: READING TIME: 5 MINUTES**

**WRITING TIME: 40 MINUTES**

Read the case notes and complete the writing task which follows.

### **Notes:**

You are a practitioner examining a 45-year old female patient, Ms Anne Hall.

#### **PATIENT DETAILS:**

**Name:** Anne Hall (Ms)

**DOB:** 19.09.72

Height: 163cm Weight: 75kg BMI: 28.2 (overweight 18/6/18)

**Social History:** Teacher (Secondary – History, English)  
Divorced, 2 children at home (born 2002, 2004)  
Non-smoker (since children born)  
Social drinker – mainly spirits

#### **Substance Intake:**

Nil

**Allergies:** Codeine; dust mites; sulphur dioxide

**Family history:** Mother – hypertension; asthmatic; Father – peptic ulcer  
Maternal grandmother – died heart attack, aged 80  
Maternal grandfather – died asthma attack  
Paternal grandmother – unknown  
Paternal grandfather – died 'old age' 94

#### **Previous medical history:**

Childhood asthma; chickenpox; measles  
1983 tonsillectomy  
1990 hepatitis A (whole family infected) 1992 sebaceous cyst removed  
1995 whiplash injury  
2006 depression (separation from husband); SSRI – fluoxetine 11/12  
2008 overweight – sought weight reduction  
2010 URTI (Upper Respiratory Tract Infection)  
2012 dyspepsia  
2014 dermatitis; prescribed oral & topical corticosteroids

18/6/18

Presenting complaint: dysphagia (solids), onset 2 weeks ago post-viral (?) URTI  
URTIs self-medicated with OTC (over-the-counter) Chinese herbal product - contents unknown

No relapse/remittent course

No sensation of lump No obvious anxiety

Concomitant epigastric pain radiating to back, level T12 Weight loss: 1-2kg

Recent increase in coffee consumption

Takes aspirin occasionally (2-3 times/month); no other NSAIDs

Provisional diagnosis: gastro-oesophageal reflux +/- stricture

**Plan:**

Refer gastroenterologist for opinion and endoscopy if required

↓ coffee/alcohol intake

Cease OTC product

Pantoprazole 40mg daily

### **Writing Task:**

Using the information in the case notes, write a letter of referral for further investigation and definitive diagnosis to the gastroenterologist, Dr Jason Roberts, at Newtown Hospital, 111 High Street, Newtown.

**In your answer:**

- **Expand the relevant notes into complete sentences**
- **Do not use note form**
- **Use letter format**

**The body of the letter should be approximately 180–200 words.**

Any answers recorded here will not be marked.

Dear Dr Roberts,

Re: Ms Anne Hall, DOB 19.9.1972

Thank you for seeing Ms Hall, a 45-year-old secondary school teacher, who presented today with a two-week history of gastro-oesophageal reflux with possible stricture. I am referring Ms Hall to you for further investigation and an endoscopy if required.

Ms Hall's symptoms follow a constant course and include dysphagia for solids, epigastric pain radiating posteriorly to T12 level, and concomitant 1-2kg weight loss. The problem commenced after an upper respiratory tract infection two weeks ago for which she self-prescribed an over-the-counter Chinese herbal product with unknown ingredients. There are no apparent signs of anxiety, and no sensation of a lump.

Ms Hall has recently increased her coffee consumption and takes aspirin 2-3 times a month. She has a history of dyspepsia (2012), and dermatitis for which she was prescribed oral and topical cortisone. She ceased smoking 15 years ago. She drinks socially (mainly spirits), has a family history of peptic ulcer disease and is allergic to codeine. Her BMI is currently 28.2.

I have recommended that Ms Hall reduces her coffee and alcohol intake and immediately stops taking the over-the-counter product. In addition, I have prescribed Pantoprazole 40mg daily.

I would be grateful if you could provide Ms Hall with a definitive diagnosis. If you require any further information, please do not hesitate to contact me.

Yours sincerely,

Doctor
